RADICONDOLI CREATIVE LAND

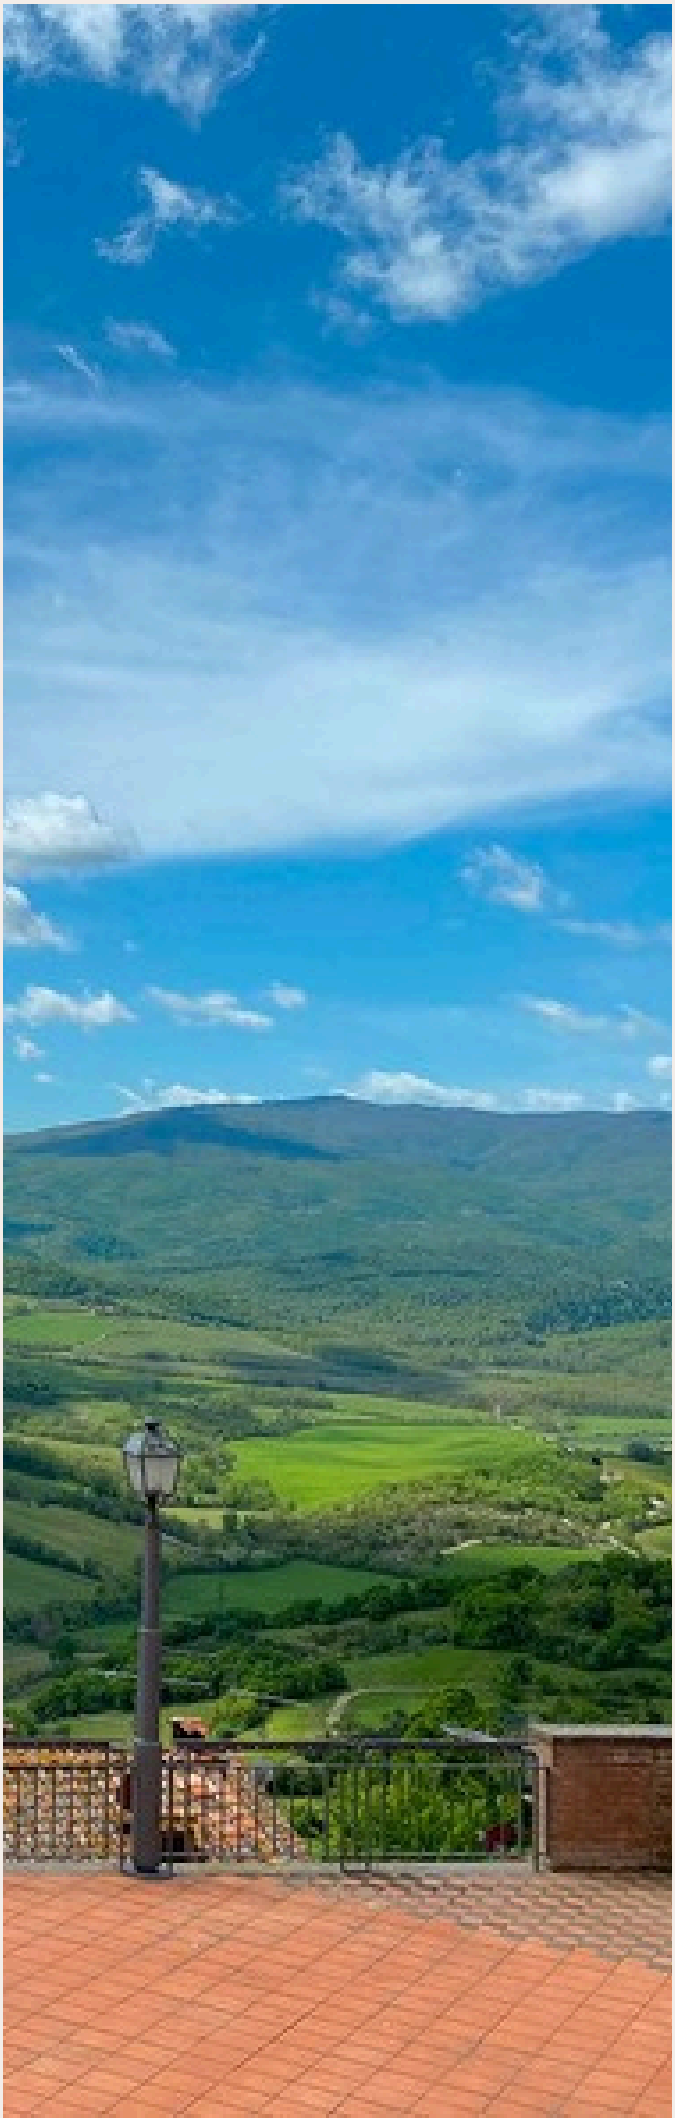

Where energy becomes inspiration

Radicondoli is not simply a charming destination in the heart of Tuscany: it is a place of roots, a living ecosystem that cannot be replicated elsewhere. Part of the **UNESCO Global Geopark of the Metalliferous Hills**, its identity stems from geological, historical and environmental heritage recognised internationally, and from deep, invisible elements rooted in the earth itself.

What makes Radicondoli unique is its **original energy**: a real, geothermal and ancestral force that rises from beneath the ground and flows through the landscape, influencing the rhythm of life, the quality of silence and the intensity of the experience. It is not only a natural resource, but a **tangible presence that can be felt, breathed in and internalised**.

Beyond its physical and scientifically recognised dimension, this energy also resonates with holistic traditions, where it is associated with the Earth element and with deep grounding processes. Contact with such an energetically active land naturally encourages a **sense of stability and centring**: the body slows down, the breath deepens and the mind anchors itself in the present. At the same time, the primordial force rising from underground acts as a regenerative impulse, helping release tension and restore inner balance. A tangible experience, perceived as a return to a state of **essential harmony**.

This connection gives rise to the concept of “Terra Creativa – Creative Land”: a place where the **earth is not a backdrop**, but an active agent of transformation. The energy flowing beneath Radicondoli becomes nourishment for the soul, stimulation for the mind and fertile ground for personal renewal. Here, travel stops being consumption and becomes a **transformative experience**.

A DESTINATION DESIGN PROJECT

Regeneration as destination

This catalogue is the outcome of the Visit Radicondoli Destination Lab, a **collaborative design process** created to enhance local resources, build a distinctive tourism identity and develop new opportunities through experiential travel.

Starting from an analysis of **local identity** and dialogue with local operators, the project has transformed Radicondoli's natural, cultural, creative and food-and-wine heritage into a coherent range of experiences aligned with the "Terra Creativa – Creative Land" positioning: a destination where energy becomes inspiration and **travel becomes an authentic, regenerative experience** deeply connected with the local area.

The catalogue brings together the **mapping, research, development and organisation of the tourism on offer**, with the aim of providing a practical tool that encourages collaboration among operators, enhances existing excellence and tells the story of Radicondoli through a unified and recognisable narrative.

BEFORE YOU EXPLORE THIS CATALOGUE...

RADICONDOLI IS NOT JUST A DESTINATION: IT IS A PLACE OF TRANSFORMATION

DEEP RESET

Disconnect to reconnect. We live immersed in hyperconnectivity, urban stress and the constant search for new stimuli. Radicondoli responds to this contemporary need by offering an **authentic space for decompression**, far from noise and close to the natural rhythms of the earth.

Through the silence of the woods, the strength of the landscape and the geothermal warmth rising from underground, our experiences encourage a **natural lightening of the mind**, deep reconnection and a return to what is essential. A journey to turn down the noise of the world and rediscover your centre.

A GREEN HILL TOWN IN THE HEART OF TUSCANY

Radicondoli offers a rare balance: the peace of an authentic hill town surrounded by nature and, at the same time, easy **access to some of Tuscany's most iconic destinations**.

Thanks to its strategic location, every programme can be enriched with excursions and experiences to **Florence, Siena, San Gimignano, Volterra and Monteriggioni**, as well as the evocative landscapes of the **Maremma** and the **Etruscan Coast**.

For holistic retreats, corporate experiences and group programmes, cultural exploration can be integrated to create an alternation between **inner work, nature and artistic beauty**. For destination weddings, Radicondoli becomes an ideal setting for intimate, authentic celebrations, while giving guests the opportunity to turn their stay into a **complete tuscan experience**.

BEYOND WELLNESS: A TRANSFORMATIVE EXPERIENCE

Wellbeing today is often associated with temporary breaks, treatments and moments of relaxation. Radicondoli offers something different: an experience capable of working at a deeper level through the **relationship between people, nature and place**.

The territory is not merely a backdrop but an active element of the experience. Its geothermal energy, the **silence of its landscapes** and its authentic character create ideal conditions for slowing down, grounding and finding balance. The catalogue's proposals are based on grounding — reconnecting body and mind with the present — and **inner regeneration**, supported by contact with unspoilt nature and experiences designed to nourish the body, emotions and creativity.

You do not come here to escape the world, but to rediscover your own.

A CUSTOMISABLE EXPERIENCE BUILT AROUND YOUR GOALS

Every proposal **can be tailored** to the type of traveller, the group and the purpose of the experience. For those seeking wellbeing and reconnection, Radicondoli can become a **regenerative pause after travelling through Tuscany**. 3-night journeys for a short regenerative break

INNER WALK.

Walking towards yourself
