
THE MIDDLE AGES IN VALDELSA VALDICECINA

The journey to discover the medieval treasures of this region originates in Monteriggioni, a hamlet of such authenticity that Dante, in his *Inferno*, compares Monteriggioni's medieval towers to terrifying giants looming from the depths of the abyss.

Next, the journey continues toward San Gimignano, the "medieval Manhattan," characterized by its iconic towers and museums such as San Gimignano 1300, where visitors have the chance to travel back in time and immerse themselves in the history of a town designated a UNESCO World Heritage Site.

The trip proceeds to Poggibonsi, leading the following day to the discovery of its Archeodromo—an area of historical and archaeological interest located atop the town's hill.

The route concludes with the discovery of Volterra, where right in the heart of the town stands the oldest government palace in Tuscany, protected by a perfectly intact medieval city wall.

Snapshot:

- 2 days / 1 night
- Target: school groups
- Price per person in a multi-bed room starting from 139,00 (The fee is calculated on a base of 25 people. One gratuity is guaranteed every 25 participants)
